

Which Changing Table is Right for My Project?

- **For new construction projects:** A changing table that is height-adjustable, has safety rails, supports at least 400 pounds, the changing surface is a minimum of 70" x 30".
- **For retrofit projects:** same as above, except a changing surface can be narrower than 30" if the standard size will not fit in the existing restroom.

***Inquire with product distributors for exact pricing, shipping, and discounts.**
